EDUCATION

B.S. Information Technology — App Development Track

Expected 2026

Penn State University | University Park, PA

- Relevant Coursework: Web Application Development, Database Management, Software Engineering, Human-Computer Interaction, Networking & Security

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, React, Tailwind CSS, Java, HTML/CSS, Node.js, REST APIs

Design & Motion: Adobe After Effects, Blender 3D, Figma, Motion Graphics, Video Editing, Compositing

Tools & Platforms: Git, Unix/Linux terminal, VS Code, Docker (familiar), MongoDB (familiar)

Soft Skills: Remote team coordination (150+ collaborators), project scheduling, client communication

EXPERIENCE

Freelance Video Editor & Motion Designer

2022 – Present

Fexalan (youtube.com/@Fexalan) | **Midnight Racing Tokyo (Roblox)** | Remote

- Produced trailers, gameplay videos, and short-form content for Fexalan, a YouTube channel with 65K subscribers and 13.6M+ lifetime views, handling end-to-end editing from raw footage through final delivery.
- Created promotional and in-game video content for Midnight Racing Tokyo, a Roblox title with 164M+ visits, 1,200+ concurrent active players, and a community of nearly 900K members — one of the platform's top racing experiences.
- Coordinated production shoots involving up to 150 participants across multiple time zones; built and managed complex recording schedules while operating inside 3D game environments to capture footage.
- Created custom motion graphics, visual effects, and animations using Adobe After Effects and Blender; delivered broadcast-ready assets to consistent quality standards across multiple ongoing client relationships.

Server

2021 – Present

Food Service | Collegeville, PA

- Maintained high-volume customer service under pressure, managing multiple tables and requests simultaneously while ensuring consistent quality.
- Developed strong interpersonal and communication skills working within a fast-paced team environment.

PROJECTS

Full-Stack Web Application with Custom 3D UI [↗ Live Demo](#) · React · Tailwind CSS · Blender · JavaScript

- Designed and developed a complete web application featuring a custom user interface built from scratch using React and Tailwind CSS, with 3D renders created entirely in Blender integrated as visual assets.
- Focused on delivering a polished, intentional UX — demonstrating both front-end engineering ability and motion/visual design sensibility in a single project.
- Independently scoped, designed, and deployed the project outside of coursework, reflecting self-directed learning and initiative.

Game Trailer & Broadcast Media Production · After Effects · Blender · Premiere Pro

- Created high-production-value trailers and promotional content for major game releases, applying motion graphics, color grading, and sound design to produce broadcast-quality video.
- Gained hands-on experience with the full creative pipeline: concept, storyboard, asset creation, animation, and delivery.
